

## Aqua to Replace Water Main in 3-2

### Henry Lee Willet Park Parking Lot - Staging Area

Beginning on Monday, January 4, an Aqua water main replacement project will begin in the neighborhoods around Henry Lee Willet Park (see the list of streets in the **Issues Archive** TAB file **Aqua Work in 3-2**). All residents who will be affected have been notified of the project by Aqua. Brubacher Excavating, Inc. is doing the work and was in need of a construction staging area for the duration of the project.

After discussions, the Township and Brubacher Excavating, Inc. have agreed to allow the Henry Lee Willet (HLW) Park parking lot (1791 Twining Road) to be used for construction staging from January to March. If space is still needed into April, the staging area will be consolidated so the parking lot can accommodate at least 8 cars in order for park users to use the parking lot. This was done because HLW Park is home to a pair of tennis courts and demand for their use will begin to grow in April.

In return, the Township will receive:

- \$1,000 per month for use of the parking lot (we plan to reinvest that money into the park)
- Any appropriate repairs to the parking lot, access apron and/or sidewalk caused by construction materials or vehicles
- Re-stoning of the parking lot, if necessary

Construction will be from 7 am to 3:30 pm. Residents will have access to their home, but may have to use an alternate route as work zones change.

Residents will receive 24 hours notice of scheduled shutdowns. Emergency shutdowns may be necessary. If so service will be restored ASAP. Any questions contact Mike Staerk, Superintendent of construction, 215-659-2505 ext. 56005.
