

Twining Valley Land Use Feasibility Study

As some of you may know there is ongoing discussion as to what the township should do when the lease for the Twining Valley Golf and Fitness Center runs out in 2019.

There have been public surveys and two public meetings as well as steering committee meetings made up of various members of the Upper Dublin community. Some good ideas have come out of these meetings as to how this land can be put to best use to serve the Upper Dublin community.

The consultant, Victor DePallo, presented three options for discussion which include: a community meeting building, an amphitheater, many hiking trails, and a chip-and-put or 18 hole par three golf course. More details will be posted on line.

These three options are the first to be formally presented for consideration. Nothing is etched in stone. The steering committee is still asking for more input from the community. Please use the contact information provided in this newsletter to submit your questions and ideas for the best use of this land.
