

UD Township Municipal Complex Master Plan

As you know, Upper Dublin has no real town center. The municipal complex has become the location for our community to meet, work, learn, study, exercise etc. Although the staff has been trying to accommodate the needs of the community, their resources are being stretched. There is not enough space and the space itself is not suited for these purposes.

The master plan will evaluate both community and departmental needs and how best the complex can accommodate community needs. The master plan will explore possible redesign or expansion of office, programming and public space. Alternative locations have been discussed in the past and may be re-considered based on the outcome of the master plan.
